Have there been estimates to this yet... can you respond back to Mr. Graham...

With Regards, Steve

Subject: Gold King Mine Spill and Mexico

Sir,

The USNORTHCOM J3 - Major General Briggs - contacted me asking about estimates of how much contaminate from the Gold King Mine Spill will make its way south in to Mexico?

My Plans officer who is in NM says that the local news is reporting that due to the particulate nature of the spill - they expect much of the contaminate to settle in to the river basin as it flows south.

Just wanted to check and see what the EPA thinks about the question regarding estimates of contaminate that will make it all the way to Mexico?

Thanks

COL Barry Graham
